Do you know how many tigers there are in India? Take a guess… Ok this is the answer… there are about 1,000 in India and about 3,000 in the world. A century ago there were 40,000 tigers just in India and about 80,500 tigers in the world!

It is really sad, the numbers have declined because people have been hunting them. Many animal protection groups throughout the world are trying to put an end to this.
